01 PROFILE

Full-stack software engineer building web and mobile applications. Works across JavaScript, TypeScript and PHP, with project experience spanning React interfaces, storefronts, Node.js APIs and database-backed applications.

02 TECHNICAL SKILLS

Languages and interfaces: JavaScript, TypeScript, HTML5, CSS3, React, React Native, Expo

Backend and data: Node.js, Express, NestJS, PHP, Laravel, MongoDB, MySQL, PostgreSQL, Redis, BullMQ

Tools and cloud: AWS, Docker, Git, GitHub

03 SELECTED PROJECTS

Cosmo Mobile Spares | React, TypeScript, Vite, Tailwind CSS, React Router, Supabase, Paystack
Multi-page storefront for phone parts and repair accessories, with category and product browsing, a cart, delivery choices, checkout and product management.

Node-Store | Node.js, Express, MongoDB, JWT, Cloudinary, Nodemailer
Store API with authentication, user, admin and product routes, image uploads, and account verification and password-reset email templates.

SIR-KEN-EYEWEAR | React, Tailwind CSS, Vite
Responsive eyewear storefront featuring a product catalogue, cart drawer, about and testimonial sections, and an order form.

JavaScript utility apps | JavaScript, browser storage, Chart.js, OpenWeatherMap API
Built weather dashboards with current conditions and forecasts, a currency converter with a simulated trend chart, and a to-do app that retains tasks after refresh.

04 EXPERIENCE

Product Manager & Sales Representative | Bejork Furniture Store
Understand customer needs, explain product features, help compare options and support informed purchasing decisions. This work builds customer-focused communication, product thinking and sales support skills.

05 TEAM COLLABORATION

Collaborates with developers to clarify tasks, discuss implementation approaches, coordinate contributions, share progress and bring separate pieces together into a working solution.
